## Technologies:

• Ajax, Apache, AWS, GIT, Gulp, NPM

#### OS Systems:

• Windows, Mac OS

## Work Experience:

August 2017 - September 2018

IQ Agency,

#### Full Stack Developer

 Made standalone landing pages, interactive HTML-Emails, and HTML5 banner ADs for Pergo and other Mohawk brands. To ease things for myself and other developers I created different build systems to facilitate the development of the emails and landing pages. Converting pure HTML, Handlebars or Nunjucks into HubL.

Required: HTML, CSS, JS, Ajax, PHP, MySQL, Gulp, Nunjucks, Handlebars, HubL

Implemented: Youtube, Facebook, Hubspot, and other APIs

Rebuilt and maintained several sites for the company. Including their own portfolio site. Sites
built as Drupal or WordPress themes with no required plugins. Due to the unique designs
presented for some sites I built several different modular admin panel for WordPress. Allowing
users to have varying degrees of control over the design and layout of their sites.

Required: HTML, CSS, JS, PHP, MySQL

Implemented: Youtube, Facebook, Google, SharpSpring, MailChimp and other APIs

November 2012 - Present

## newtype IIc,

Co-owner/Co-founder and Lead Developer

• Rebuilt and maintain the Coca-Cola holiday caravan site for Coca-Cola. Updated the site to work across all devices and to improve its usability.

Required: HTML, CSS, JS, Ajax, PHP, MySQL

 Developed a fully custom WordPress theme for our client to use as their portfolio site. Included several custom post types and unique layouts to highlight their work, staff, news, careers and of course a standard blog.

Required: HTML, CSS, JS, PHP, MySQL

• Developed a fully custom WordPress plugin for NBCuniversal - Green is Universal. Plugin needed to allow for custom layouts that could be edited from the admin panel. With many custom options. That allowed it to be reused and edited with ease.

Required: HTML, CSS, JS, PHP, MySQL

Developed and co-designed a video/tech blog with a fully custom CMS. The client wanted a fully
custom solution for their website to replace their WordPress site. We built a highly configurable
CMS based off codeigniter and custom HTML5 video player with as AS3 fallback. That improved
load times by an average of 50% and reduce hosting costs significantly for the client.

Required: HTML, CSS, JS, Ajax, XML, RSS, PHP, MySQL

Implemented: Cloudflare and Youtube, Vimeo and Facebook APIs

• Many other sites of various scales and requirements.

September 2011 - November 2012

Brandmovers,

## PHP Developer and Frontend Developer

Built a promotion site for the movie Tower Heist. The site allowed contestants to enter via
Twitter when using a special hashtag. The tweets would be then used to generate a 3D tower
that revealed prizes as it grew.

Required: HTML, CSS, JS, Ajax, PHP, MySQL, AS3

**Implemented:** Twiiter API

• Built the official site for Moe's Southwest Grill. The client requested a CMS for their menu and ingredients with an onsite nutritional calculator for their menu items.

Required: HTML, CSS, JS, Ajax, XML, PHP, MySQL

• Built multiple short-term promotional give away sites for companies around the world. Sites varied from simple form-based promotions to fully interactive promotions via canvas or flash. Sites required constant tweaks and updated to help protect against fraud.

Required: HTML, CSS, JS, Ajax, XML, RSS, PHP, MySQL, AS3

Implemented: Youtube, Vimeo, Twitter, SquareSpace Facebook, and other APIs

Misc: Video editing and sound editing used for multiple sites.

## April 2010 - October 2011

## Stuidoplex Studios / FuzeBox INC,

Web Developer

• Built multiple WordPress themes for clients or for videos produced in-house (Studioplex). Themes were never dependent on 3rd party code or plugins.

**Required:** HTML, CSS, JS, Ajax, XML, RSS, PHP, MySQL, AS3 **Misc:** Video editing and sound editing used for multiple sites.

## April 2007 - October 2011

# Freelance / Contract,

Web Developer

- Developed multiple custom WordPress themes for pixelmii.
- Developed an interactive portfolio of De'Sean Thomas based on his designs in ActionScript 3.
   Portfolio used multiple XML files to control content within the site.
- Developed a Flex multimedia platform that dynamically loaded in advertisements for the employer that where searchable and filterable. Support different types of advertisements (HTML, video, image, flash) uploaded by the clients' vendors.
